Experience

Personal Project

10/2025 - 12/2025

Description: Develop an online shopping application that helps users search for products through an AI chatbot and provides personalized product recommendations.

Technology used:

- **FrontEnd:** Flutter(Getx)
- **BackEnd:** Supabase (Authentication, Database PostgreSQL, và Realtime APIs).
- **AI:** Recommend system, Gemini chatbot
- **Github:** <https://github.com/quanganh4869/DoAnCn2>

Main functions:

- Develop smooth and comprehensive e-commerce user interfaces (UI), including product browsing, wishlist, shopping cart, order placement, and order management, while optimizing user experience (UX) using Flutter.
- Integrate Supabase Authentication for user management and data security.
- Integrate AI by connecting APIs to build a customer support chatbot and a behavior-based product recommendation system.
- Manage application state and process data in real-time.

Skill

Having knowledge of the tools

- Mobile Development: Flutter, Kotlin.
- Fundamental knowledge: OOP, Data Structures & Algorithms (DSA).
- State Management: Provider, GetX.
- Backend & Database: Firebase (Auth, Realtime DB), Supabase, PostgreSQL, MySQL.
- Tools: Git/GitHub, Postman, Figma.
- Other : Possesses UI/UX thinking skills and the ability to read and understand technical English documents.

Education

Information technology

2022 - 2026

Vietnam-Korea University of Information and Communication Technology

Objective

Short-term objective:

- Participate in a real-world work environment, gain a basic understanding of the development process of a technology product.
- Study and practice skills relevant to the work process.
- Develop soft skills in teamwork, communication, and information exchange.

Development orientation::

- Develop management-oriented skills to become a Project Manager.
